PROFESSIONAL SUMMARY

Software Engineer with around 3 years of experience developing scalable applications using C#, ASP.NET Core, REST APIs, SQL, and Azure. Experienced in backend development, API security, performance optimization, microservices, and GenAI integration using OpenAI APIs.

EDUCATION

College of Engineering Guindy, Anna University

2019 – 2023

Bachelor of Engineering in Computer Science and Engineering – CGPA: 8.39/10.0

Chennai, India

WORK EXPERIENCE

Accenture

Apr 2026 – Present

Packaged App Development Analyst

Chennai, India

- Architected scalable **ASP.NET Core Web APIs** using **Clean Architecture**, standardizing development across application and infrastructure layers and accelerating delivery of **10+ API endpoints** through reusable, testable components.
- Integrated **GPT-5.2 models through OpenAI APIs** to automate AI-assisted workflows, reduce manual processing, and enable faster enterprise user interactions.
- Engineered end-to-end AI processing across **2 service types - console applications and Web APIs**, orchestrating model interactions, data transformation, and business logic.
- Secured **38 enterprise API endpoints** using **JWT and Azure AD**, enforcing role-based authorization across **5+ user roles** and preventing unauthorized access across application and API layers.

Jio Platforms Limited

Oct 2023 – Apr 2026

Software Development Engineer II

Navi Mumbai, India

- Refactored a high-volume **C# spatial-data automation pipeline** using **multithreading and concurrency**, boosting throughput from **9 to 520 records/sec** while ensuring reliability through comprehensive testing.
- Developed a secure **.NET Core Web API** backend for FiberInsights, integrating **JWT authentication and role-based access control** across **18+ API endpoints** to ensure data privacy and security.
- Deployed a **Redis-based cache scheduler** for Jio Beat Planner, serving **100K daily active users**, accelerating data retrieval by **25%**, and reducing backend response time by **30%** through RESTful services.
- Tuned **Oracle Database** performance on **50M+ row datasets** using advanced partitioning and composite indexing, delivering **40% faster queries** and **30% lower maintenance overhead**.
- Implemented a custom **.NET Core authorization filter framework** securing **30+ modules** with role-based access control for **100+ roles and 5M daily users**, maintaining **100% security compliance** with zero unauthorized access.

TECHNICAL SKILLS

Languages: C#, Java, Python, SQL, JavaScript, TypeScript

Backend & AI: ASP.NET Core, Web API, Entity Framework Core, LINQ, ADO.NET, OpenAI APIs, Azure OpenAI, RAG, Embeddings, Semantic Search, Server-Sent Events

Databases & Caching: PostgreSQL, pgvector, Oracle, SQL Server, PL/SQL, Redis

Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, CI/CD Pipelines, Git, Postman, Visual Studio, Serilog

Architecture & Security: Clean Architecture, Microservices, REST APIs, JWT, Azure AD, RBAC, SOLID Principles, OOP, Design Patterns, Multithreading, Concurrency

Testing & Methodologies: xUnit, NUnit, Unit Testing, Agile/Scrum, Code Reviews, Debugging

PROJECTS

AI Knowledge Assistant | *ASP.NET Core, PostgreSQL, pgvector, Angular, OpenAI API*

- Built a RAG-based knowledge assistant with document upload, semantic search, vector embeddings, and conversation-aware responses.
- Implemented JWT authentication, PostgreSQL pgvector search, structured logging, health checks, and server-sent event streaming.
